

Advancing the Field of Fetal Cardiovascular Care and Science through Collaborative Research, Education and Mentorship

FETAL HEART SOCIETY SURVEY/QUESTIONNAIRE PROPOSAL

Deadline: Rolling

Format: 11 point font, single line spacing and not to exceed 2 pages

Date:

Study Title:

Principal Investigator and hospital/program affiliation: Should be a Fetal Heart Society (FHS) Active Member

Intended Use of Survey: Please delineate whether the results of this survey will be used for the purposes of answering a question and obtaining new knowledge for purposes of dissemination through publication vs. a survey intended to assess best practices or for quality purposes that will not be submitted for publication. If this is intended as a research product, please address A. – C. below:

A. Specific Aims: Please delineate specific research questions and hypotheses that the survey aims to study.

B. Significance/Background: Please provide background that justifies why this survey based study is important

C. Brief Approach:

1. Survey design (i.e. validation process or previously validated)
2. Study population (who will the survey be distributed to)
3. Independent variables: List variables to be studied (What are the primary predictors of the survey)
4. Outcomes/Dependent variables: List primary and secondary outcomes.
5. Timeline
6. Budget details. May be non-applicable for survey based studies unless assistance is requested from the DCC for distribution of survey and/or analysis of survey results.

Please attach a copy of the survey to your submission.
